Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) By Harvey Checkoway, Neil Pearce, David Kriebel

This widely used text provides a clear and critical summary of research approaches to the epidemiological study of workplace hazards. It describes the historical development of occupational epidemiology, methods for characterizing occupational exposures, and techniques for designing and implementing epidemiologic studies in this area. The relative strengths and limitations of various study designs for investigating specific health outcomes are emphasized. Also included are more advanced discussions of statistical analysis, exposure and dose modeling, and subsequent applications of data derived from epidemiologic research, as in meta-analysis, pooled analysis, and statistical analysis, exposure and dose modeling, and risk assessment. Since the first edition was published 15 years ago, there have been numerous advances in epidemiologic methods to accommodate a broadened scope of investigations of occupational exposures and associated adverse health outcomes. Thus, in this Second Edition the authors have updated their discussions of methodology to include such topics as case-cohort and case-crossover designs and statistical analysis of repeated measures data, and have expanded the examples they use throughout the book to demonstrate the applications of these methods to a wide range of acute and chronic health outcomes. They have also added a new chapter on occupational health surveillance. Their text is unique for its strong emphasis on the definition and assessment of exposures, the application of quantitative exposure data to epidemiologic models, and the recognition that improvements in workplace risk identification and quantification will come from careful integration of these approaches. This fine volume will serve both as a textbook for courses on occupational epidemiology and as a practical handbook of the design, implementation, and evaluation of research in this field.

Editorial Review

Review

An easy-to-read, concise, and practical textbook is a valuable contribution to every field. The second edition of *Research Methods in Occupational Epidemiology* by Checkoway et al is such a good book. I will keep this book on my shelf as my first choice for issues on exposure..." --*Scandinavian Journal of Work, Environment & Health*

"I am unaware of any comparable books on the subject of occupational epidemiology that have been published in the past decade. This book is an excellent and comprehensive text and reference book and, like the first edition, it is quite suitable for both an introductory and an intermediate audience." --*American Journal of Epidemiology*

"...a wonderfully succinct and lucid text that is at the same time accessible to the novice reader and useful to the experienced practitioner. The authors have done a masterful job of improving this already outstanding book..." --*American Journal of Epidemiology*

"...the second edition of a textbook that has been regarded as the standard in occupational epidemiology during the las decade. I would certainly recommend this second edition of this book to anyone interested in occupational epidemiology." --*International Journal of Epidemiology*

From reviews of the first edition

"An up-to-date presentation of research methods in occupational epidemiology is provided by this well-written and well-structured textbook...This excellent book is likely to become a standard reference text. All those engaged in occupational epidemiology should obtain a copy."--*International Journal of Epidemiology*

"A remarkably well-written, easy-to-read, concise synopsis of the whole range of methods used in occupational epidemiology. Many examples, tables, diagrams, with comprehensive summaries of statistical concepts and various methods used to model exposure and dose. A valuable reference for basic and intermediate work."--*APHA Occupational Health and Safety Newsletter*

"This book is a worthwhile introductory text to the emerging field of occupational epidemiology. It gives an

extensive discussion of the practical problems to be faced in planning and executing occupational studies, and will be of particular benefit to persons starting work in this field of study."--*Chronic Diseases*

About the Author

Harvey Checkoway is at University of Washington School of Public Health and Community Medicine. Neil E. Pearce is at Massey University Wellington Campus.

Users Review

From reader reviews:

Anne Bonk:

Nowadays reading books become more than want or need but also be a life style. This reading behavior give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The information you get based on what kind of guide you read, if you want attract knowledge just go with training books but if you want feel happy read one together with theme for entertaining like comic or novel. The particular Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) is kind of e-book which is giving the reader unpredictable experience.

Jose Tiernan:

The book untitled Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) contain a lot of information on it. The writer explains the woman idea with easy technique. The language is very clear to see all the people, so do not really worry, you can easy to read the item. The book was compiled by famous author. The author brings you in the new period of literary works. You can easily read this book because you can keep reading your smart phone, or product, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site and order it. Have a nice go through.

Mark Nixon:

You may spend your free time to learn this book this publication. This Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) is simple to develop you can read it in the park your car, in the beach, train in addition to soon. If you did not have got much space to bring often the printed book, you can buy typically the e-book. It is make you better to read it. You can save often the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Richard Diller:

Many people spending their time period by playing outside using friends, fun activity using family or just watching TV all day long. You can have new activity to invest your whole day by looking at a book. Ugh, do

you think reading a book will surely hard because you have to accept the book everywhere? It all right you can have the e-book, getting everywhere you want in your Smart phone. Like Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) which is keeping the e-book version. So , try out this book? Let's see.
