**What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science)** From Oxford University Press

Facial expressions convey a vast amount of information, but only recently have investigators begun to explore the precise details of what expressions are telling us about internal states, social behavior, and psychopathology. The Facial Action Coding System (FACS), which is a tool for comprehensively measuring facial expressions, plays a central role in this rapidly growing and exciting field. This volume represents the state of the art in research on facial expressions. Drawing from psychology, medicine, and psychiatry, the chapters address such key issues as the dynamic and morphological differences between voluntary and involuntary expressions; the relationship between what people show on their faces and what they say they feel; and whether it is possible to use facial behavior to distinguish among different psychiatric populations. The volume includes groundbreaking work on how the face reveals emotions, deception, psychopathology, and aspects of physical health. An essential reference for anyone pursuing research in facial expressions, this work combines classic papers with up-to-date commentary by the authors.

### **Editorial Review**

#### About the Author

Paul Ekman is at University of California, San Francisco. Erika Rosenberg is at College of William and Mary.

### **Users Review**

#### **From reader reviews:**

##### **Julia Jenkins:**

Typically the book What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science) will bring one to the new experience of reading any book. The author style to explain the idea is very unique. If you try to find new book to read, this book very appropriate to you. The book What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science) is much recommended to you to read. You can also get the e-book through the official web site, so you can more easily to read the book.

##### **Orville Norman:**

Reading can called imagination hangout, why? Because when you find yourself reading a book specifically book entitled What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science) the mind will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely can become your mind friends. Imaging every single word written in a publication then become one web form conclusion and explanation that will maybe you never get ahead of. The What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science) giving you an additional experience more than blown away your head but also giving you useful information for your better life in this particular era. So now let us show you the relaxing pattern here is your body and mind will be pleased when you are finished studying it, like winning a game. Do you want to try this extraordinary paying spare time activity?

##### **Catherine Kuntz:**

Do you have something that you like such as book? The reserve lovers usually prefer to choose book like comic, limited story and the biggest some may be novel. Now, why not striving What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science) that give your enjoyment preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the opportunity for people to know world much better then how they react when it comes to the world. It can't be claimed constantly that reading behavior

only for the geeky person but for all of you who wants to possibly be success person. So , for every you who want to start examining as your good habit, you may pick What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science) become your own personal starter.

**Heather Wade:**

It is possible to spend your free time to read this book this e-book. This What the Face Reveals: Basic and Applied Studies of Spontaneous Expression Using the Facial Action Coding System (FACS) (Series in Affective Science) is simple to bring you can read it in the recreation area, in the beach, train along with soon. If you did not possess much space to bring the printed book, you can buy often the e-book. It is make you simpler to read it. You can save often the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.
