Editorial Review

Review

"My favorite field guides are actually works of natural history, published by the University of California Press. As if to compensate for their bulk and weight, the titles in the California Natural History Guides offer an abundance of illuminating information about what can be glimpsed from the paths and trails of our state parks. [Natural History of the Islands of California] is a kind of homage to its original authors-and, thanks to its sweep and grandeur, its detail and practicality, a magnificent one."--"Los Angeles Times

From the Inside Flap

"You want to own this book. Perhaps the most impressive thing about this book is the number of illustrations, most of them photographs taken by the author. This guy knows of what he speaks!"—George M. Clark, California Wilderness Coalition

From the Back Cover

This book includes a description of organisms, rocks, and the environment and an attempt to explain what factors through time created what we see today. The facts behind the concepts that are stressed in this book have been drawn from ecology, zoology, botany, biogeography, climatology, paleontology, and geology.
