Editorial Review

"The text is written at a level that can be understood by all levels of medical personnel from students to experienced practitioners involved in the treatment of patients with cardiovascular disease. Each of the 61 chapters is authored by a distinguished investigator or clinician in cardiology... This edition contains new chapters and updates that highlight very contemporary issues (i.e. heart failure with preserved ejection fraction or stem cell therapy)... a well written supplement to the main textbook that is comprehensive in its coverage of the constellation of knowledge on the clinical syndrome of heart failure." - M. A. Thompson, MD, Doody's Review, 4 Stars

About the Author

Douglas L. Mann, MD, Gordon Cain Chair and Professor of Medicine Director, Winters Center for Heart Failure Research Baylor College of Medicine Houston, TX
