Starting Out with Java: From Control Structures through Objects plus MyProgrammingLab with Pearson eText -- Access Card Package (6th Edition) By Tony Gaddis

NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, and registrations are not transferable. To register for and use Pearson's MyLab & Mastering products, you may also need a Course ID, which your instructor will provide.

Used books, rentals, and purchases made outside of Pearson
If purchasing or renting from companies other than Pearson, the access codes for Pearson's MyLab & Mastering products may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase.

For courses in computer programming in Java
This package includes MyProgrammingLab™

Starting Out with Java: From Control Structures through Objects provides a brief yet detailed introduction to programming in the Java language. Starting out with the fundamentals of data types and other basic elements, readers quickly progress to more advanced programming topics and skills. By moving from control structures to objects, readers gain a comprehensive understanding of the Java language and its applications.

As with all Gaddis texts, the **Sixth Edition** is clear, easy to read, and friendly in tone. The text teaches by example throughout, giving readers a chance to apply their learnings by beginning to code with Java.

Personalize Learning with MyProgrammingLab
MyProgrammingLab is an online homework, tutorial, and assessment program

designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts.

MyProgrammingLab allows you to engage your students in the course material before, during, and after class with a variety of activities and assessments.

Editorial Review

About the Author
Tony Gaddis is the principal author of the "Starting Out with "series of textbooks. Tony teaches computer science courses at Haywood Community College in North Carolina. He is a highly acclaimed instructor who was previously selected as the North Carolina Community College "Teacher of the Year," and has received the Teaching Excellence award from the National Institute for Staff and Organizational Development. Besides C++ books, the "Starting Out with" series includes introductory books using the Java(TM) programming language, Microsoft(R) Visual Basic(R) .NET, and Microsoft(R) C#(R), all published by Addison-Wesley.
Judy Walters is an Associate Professor of Computer Science at North Central College in Naperville, Illinois. In addition to her many computer science courses, she enjoys teaching a freshman course on film and literature. She also enjoys studying foreign languages and cultures, and recently developed a new course in technology and society, which she taught in Costa Rica Fall 2005, as part of the college's international studies program.
Godfrey Muganda is an Associate Professor of Computer Science at North Central College in Naperville, Illinois, where he chairs the Computer Science Department. He teaches a wide variety of courses at both the undergraduate and graduate levels including courses in Object-Oriented Programming, Comparative Programming Languages, and Complier Design. His primary research interests are in the Fuzzy Sets and Systems. He won the North Central College faculty award for outstanding scholarship in 1993.

Users Review
