Thirsty Planet: Strategies for Sustainable Water Management By Constance Elizabeth Hunt

By the year 2025 nearly 2 billion people will live in regions or countries with absolute water scarcity, even allowing for high levels of irrigation efficiency. In the face of this emerging global water crisis, how should the planet's water be used and managed in the 21st century? Current international water policy sees nature competing with human uses of water. Hunt takes issue with this perspective. She suggests that nature is the source of water and only by making the conservation of nature an absolute priority will we have water in the future to apply to human uses. This book looks at the complexity of the problem; it provides a wide array of ideas, information, case studies and ecological knowledge--often from remote corners of the developing world--that could provide an alternative vision for water use and management at this critical time.

Editorial Review

Review

'Constance Hunt does a valuable service by providing a concise and readable primer on the task of preserving the freshwater ecosystems on which we all depend. Thirsty Planet is required reading for anyone interested in learning what tools we have available to meet one of the greatest challenges to humanity and nature in the 21st century.' Kathryn S. Fuller, World Wildlife Fund 'This is a tremendous book for anyone taking a serious look at global water problems. Constance Hunt exposes the powerful forces that have damaged rivers and watersheds and impaired the ability of natural ecosystems to supply clean water. She shows that the big water companies are using their power for a dramatic takeover of public water resources for private profit without thought of sustainability for the long term.' Brent Blackwelder, Friends of the Earth

About the Author

Constance Hunt is a biologist and environmentalist with considerable experience in international policy and global campaigns for water management and conservation.

Users Review

From reader reviews:

Jose Callender:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each e-book has different aim or perhaps goal; it means that reserve has different type. Some people really feel enjoy to spend their time for you to read a book. They may be reading whatever they take because their hobby is actually reading a book. Why not the person who don't like examining a book? Sometime, person feel need book if they found difficult problem or perhaps exercise. Well, probably you'll have this Thirsty Planet: Strategies for Sustainable Water Management.

Joyce Matchett:

Spent a free time to be fun activity to complete! A lot of people spent their spare time with their family, or their very own friends. Usually they performing activity like watching television, going to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your own free time/ holiday? Could possibly be reading a book may be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the book untitled Thirsty Planet: Strategies for Sustainable Water Management can be good book to read. May be it can be best activity to you.

Paul Frazier:

As we know that book is important thing to add our understanding for everything. By a book we can know

everything we wish. A book is a set of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This book Thirsty Planet: Strategies for Sustainable Water Management was filled about science. Spend your time to add your knowledge about your research competence. Some people has different feel when they reading a new book. If you know how big advantage of a book, you can sense enjoy to read a guide. In the modern era like right now, many ways to get book that you just wanted.

Edgar Hightower:

A lot of book has printed but it is different. You can get it by internet on social media. You can choose the very best book for you, science, witty, novel, or whatever by means of searching from it. It is known as of book Thirsty Planet: Strategies for Sustainable Water Management. You'll be able to your knowledge by it. Without making the printed book, it could possibly add your knowledge and make you happier to read. It is most important that, you must aware about publication. It can bring you from one location to other place.
