**Constructed Wetlands in the Sustainable Landscape** By Craig S. Campbell, Michael Ogden

LandscapeConstructed wetlands are gaining worldwide acceptance as effective, low-cost, and low-impact alternatives to unsightly, high-impact wastewater treatment facilities. The creative involvement of today's planners, landscape architects, developers, environmental engineers, and public officials is helping to maximize the potential of these wetland habitats--from their aesthetics to their multiple uses as water treatment plants, wildlife refuges, and recreational or educational facilities. Yet, to date, the literature has paid no attention to these aspects, focusing instead on the technical side of wetlands construction and function.

Constructed Wetlands in the Sustainable Landscape is the first book to integrate aesthetic design and planning issues with the technical aspects of wetlands engineering. Renowned landscape architect Craig S. Campbell and engineer Michael H. Ogden clearly demonstrate how the successful development and management of multifunctional, sustainable wetland habitats depend on harnessing the knowledge and working principles of a number of disciplines. Richly illustrated with real-world case studies, the book:

- \* Covers the concept of sustainable development and the nature of wetland processes.
- \* Discusses designs for new and existing municipal and small community wastewater treatment facilities.
- \* Contains examples of on-site planning for, and management of, stormwater renovation, single-family residential systems, and multiple-use systems.
- \* Examines landscape engineering and planning for ponds, urban wildlife, and ecological art.

Clearly written and accessible to nonengineers and nonscientists, *Constructed Wetlands in the Sustainable Landscape* is a crucial guide for landscape architects, environmental engineers, planners, developers, and others responsible for the design and management of our built environment.

## **Editorial Review**

### **Review**

"This book is a valuable resource to be consulted in the early planning stages of a wetland construction project, particularly where aesthetics and social acceptance are important factors." (Theodore J. Hogan: *Environmental Practice* 3(1), March, 2001)

"This book addresses a broad audience: water and environmental engineers, planners, landscape architects, developers and public officials responsible for planning and environment protection. Written in a clear way, it is accessible to a wider audience than engineers and scientists, and can be a useful compliment in studying. Indeed, anyone interested in sewage treatment, water protection, landscape planning and ecology may find this book useful. Specialists may benefit from a new, broader perspective on their professional problems." (*Hydrological Sciences Journal*, Feb. 2002)

### **From the Back Cover**

Constructed wetlands are gaining worldwide acceptance as effective, low-cost, and low-impact alternatives to unsightly, high-impact wastewater treatment facilities. The creative involvement of today's planners, landscape architects, developers, environmental engineers, and public officials is helping to maximize the potential of these wetland habitats—from their aesthetics to their multiple uses as water treatment plants, wildlife refuges, and recreational or educational facilities. Yet, to date, the literature has paid no attention to these aspects, focusing instead on the technical side of wetlands construction and function.

*Constructed Wetlands in the Sustainable Landscape* is the first book to integrate aesthetic design and planning issues with the technical aspects of wetlands engineering. Renowned landscape architect Craig S. Campbell and engineer Michael H. Ogden clearly demonstrate how the successful development and management of multifunctional, sustainable wetland habitats depend on harnessing the knowledge and working principles of a number of disciplines. Richly illustrated with real-world case studies, the book:

Covers the concept of sustainable development and the nature of wetland processes.

Discusses designs for new and existing municipal and small community wastewater treatment facilities.

Contains examples of on-site planning for, and management of, stormwater renovation, single-family residential systems, and multiple-use systems.

Examines landscape engineering and planning for ponds, urban wildlife, and ecological art.

Clearly written and accessible to nonengineers and nonscientists, *Constructed Wetlands in the Sustainable Landscape* is a crucial guide for landscape architects, environmental engineers, planners, developers, and others responsible for the design and management of our built environment.

### **About the Author**

CRAIG S. CAMPBELL, FASLA, is a landscape architect and owner of Craig Campbell Studio, Inc. in Santa Fe, New Mexico, and the author of *Water in Landscape Architecture*.

MICHAEL H. OGDEN, PE, is President of Southwest Wetlands Group in Santa Fe, New Mexico. The authors, both respected authorities on constructed wetlands, have conducted numerous seminars on the subject for landscape architects and planners.

## **Users Review**

### **From reader reviews:**

#### **Warren Ford:**

A lot of people always spent their very own free time to vacation or perhaps go to the outside with them family members or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity here is look different you can read some sort of book. It is really fun for yourself. If you enjoy the book that you read you can spent all day long to reading a book. The book Constructed Wetlands in the Sustainable Landscape it is rather good to read. There are a lot of people that recommended this book. We were holding enjoying reading this book. If you did not have enough space bringing this book you can buy the particular e-book. You can m0ore simply to read this book out of your smart phone. The price is not very costly but this book possesses high quality.

#### **Gary Kruse:**

This Constructed Wetlands in the Sustainable Landscape is great publication for you because the content and that is full of information for you who have always deal with world and also have to make decision every minute. This specific book reveal it details accurately using great organize word or we can state no rambling sentences in it. So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only provides straight forward sentences but tricky core information with beautiful delivering sentences. Having Constructed Wetlands in the Sustainable Landscape in your hand like finding the world in your arm, data in it is not ridiculous one particular. We can say that no e-book that offer you world in ten or fifteen small right but this book already do that. So , it is good reading book. Hey there Mr. and Mrs. hectic do you still doubt in which?

#### **Charles Montiel:**

As a college student exactly feel bored for you to reading. If their teacher inquired them to go to the library or make summary for some e-book, they are complained. Just little students that has reading's spirit or real their interest. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading seriously. Any students feel that reading is not important, boring and can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Constructed Wetlands in the Sustainable Landscape can make you truly feel more interested to read.

**India Oakley:**

Guide is one of source of know-how. We can add our understanding from it. Not only for students but additionally native or citizen will need book to know the upgrade information of year in order to year. As we know those guides have many advantages. Beside many of us add our knowledge, can bring us to around the world. By the book Constructed Wetlands in the Sustainable Landscape we can have more advantage. Don't someone to be creative people? Being creative person must prefer to read a book. Only choose the best book that ideal with your aim. Don't be doubt to change your life with that book Constructed Wetlands in the Sustainable Landscape. You can more desirable than now.
