From Springer

It is a great pleasure to share with you the Springer CCIS proceedings of the First World Summit on the Knowledge Society - WSKS 2008 that was organized by the Open Research Society, NGO, http://www.open-knowledge-society.org, and hosted by the American College of Greece, http://www.acg.gr, during September 24–27, 2008, in Athens, Greece. The World Summit on the Knowledge Society Series is an international attempt to promote a dialogue on the main aspects of a knowledge society toward a better world for all based on knowledge and learning. The WSKS Series brings together academics, people from industry, policy makers, politicians, government officers and active citizens to look at the impact of infor- tion technology, and the knowledge-based era it is creating, on key facets of today's world: the state, business, society and culture. Six general pillars provide the constitutional elements of the WSKS series: • Social and Humanistic Computing for the Knowledge Society—Emerging Te- nologies and Systems for the Society and Humanity • Knowledge, Learning, Education, Learning Technologies and E-learning for the Knowledge Society • Information Technologies—Knowledge Management Systems—E-business and Enterprise Information Systems for the Knowledge Society • Culture and Cultural Heritage—Technology for Culture Management—Management of Tourism and Entertainment—Tourism Networks in the Knowledge Society • Government and Democracy for the Knowledge Society • Research and Sustainable Development in the Knowledge Society The summit provides a distinct, unique forum for cross-disciplinary fertilization of research, favoring the dissemination of research that is relevant to international re-

Users Review

From reader reviews:

Marsha Cox:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a walk, shopping, or went to the actual Mall. How about open or perhaps read a book titled The Open Knowledge Society: A Computer Science and Information Systems Manifesto (Communications in Computer and Information Science)? Maybe it is to be best activity for you. You already know beside you can spend your time with your favorite's book, you can more intelligent than before. Do you agree with it has the opinion or you have other opinion?

Todd Voss:

Do you certainly one of people who can't read pleasant if the sentence chained from the straightway, hold on guys this kind of aren't like that. This The Open Knowledge Society: A Computer Science and Information Systems Manifesto (Communications in Computer and Information Science) book is readable by you who hate the perfect word style. You will find the facts here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to give to you. The writer associated with The Open Knowledge Society: A Computer Science and Information Systems Manifesto (Communications in Computer and Information Science) content conveys objective easily to understand by many people. The printed and e-book are not different in the information but it just different such as it. So , do you nevertheless thinking The Open Knowledge Society: A Computer Science and Information Systems Manifesto (Communications in Computer and Information Science) is not loveable to be your top record reading book?

Barbara Roundtree:

A lot of people always spent their free time to vacation or go to the outside with them household or their friend. Did you know? Many a lot of people spent many people free time just watching TV, or even playing

video games all day long. If you need to try to find a new activity here is look different you can read a new book. It is really fun for you. If you enjoy the book which you read you can spent all day every day to reading a guide. The book The Open Knowledge Society: A Computer Science and Information Systems Manifesto (Communications in Computer and Information Science) it is extremely good to read. There are a lot of those who recommended this book. These people were enjoying reading this book. When you did not have enough space to create this book you can buy the e-book. You can m0ore very easily to read this book out of your smart phone. The price is not too expensive but this book features high quality.

Sunny Weaver:

As a student exactly feel bored to help reading. If their teacher requested them to go to the library as well as to make summary for some guide, they are complained. Just small students that has reading's internal or real their interest. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful pics on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this The Open Knowledge Society: A Computer Science and Information Systems Manifesto (Communications in Computer and Information Science) can make you experience more interested to read.
