**Who's in Charge?: Free Will and the Science of the Brain** By Michael S. Gazzaniga

“Big questions are Gazzaniga’s stock in trade.”

—*New York Times*

“Gazzaniga is one of the most brilliant experimental neuroscientists in the world.”

—Tom Wolfe

“Gazzaniga stands as a giant among neuroscientists, for both the quality of his research and his ability to communicate it to a general public with infectious enthusiasm.”

—Robert Bazell, Chief Science Correspondent, NBC News

The author of *Human*, Michael S. Gazzaniga has been called the “father of cognitive neuroscience.” In his remarkable book, *Who's in Charge?*, he makes a powerful and provocative argument that counters the common wisdom that our lives are wholly determined by physical processes we cannot control. His well-reasoned case against the idea that we live in a “determined” world is fascinating and liberating, solidifying his place among the likes of Oliver Sacks, Antonio Damasio, V.S. Ramachandran, and other bestselling science authors exploring the mysteries of the human brain.

"A fascinating affirmation of our essential humanity."--Kirkus Reviews

#### From the Back Cover

The father of cognitive neuroscience and author of *Human* offers a provocative argument against the common belief that our lives are wholly determined by physical processes and we are therefore not responsible for our actions

A powerful orthodoxy in the study of the brain has taken hold in recent years: Since physical laws govern the physical world and our own brains are part of that world, physical laws therefore govern our behavior and even our conscious selves. Free will is meaningless, goes the mantra; we live in a “determined” world.

Not so, argues the renowned neuroscientist Michael S. Gazzaniga in this thoughtful, provocative book based on his Gifford Lectures—one of the foremost lecture series in the world dealing with religion, science, and philosophy. *Who's in Charge?* proposes that the mind, which is somehow generated by the physical processes of the brain, “constrains” the brain just as cars are constrained by the traffic they create. Writing with what Steven Pinker has called “his trademark wit and lack of pretension,” Gazzaniga shows how determinism immeasurably weakens our views of human responsibility; it allows a murderer to argue, in effect, “It wasn’t me who did it—it was my brain.” Gazzaniga convincingly argues that even given the latest insights into the physical mechanisms of the mind, there is an undeniable human reality: *We are responsible agents who should be held accountable for our actions, because responsibility is found in how people interact, not in brains.*

An extraordinary book that ranges across neuroscience, psychology, ethics, and the law with a light touch but profound implications, *Who's in Charge?* is a lasting contribution from one of the leading thinkers of our time.

### Users Review

#### From reader reviews:

##### Arthur Reaves:

Book is written, printed, or outlined for everything. You can learn everything you want by a e-book. Book has a different type. We all know that that book is important point to bring us around the world. Close to that you can your reading ability was fluently. A guide Who's in Charge?: Free Will and the Science of the Brain will make you to end up being smarter. You can feel considerably more confidence if you can know about everything. But some of you think that open or reading the book make you bored. It is far from make you fun. Why they may be thought like that? Have you looking for best book or suitable book with you?

**Lettie Perez:**

What do you think of book? It is just for students because they are still students or the item for all people in the world, what the best subject for that? Just simply you can be answered for that concern above. Every person has diverse personality and hobby per other. Don't to be pushed someone or something that they don't would like do that. You must know how great in addition to important the book Who's in Charge?: Free Will and the Science of the Brain. All type of book are you able to see on many methods. You can look for the internet options or other social media.

**Cassandra Rosas:**

Nowadays reading books are more than want or need but also get a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge even the information inside the book that improve your knowledge and information. The info you get based on what kind of publication you read, if you want have more knowledge just go with education books but if you want truly feel happy read one together with theme for entertaining for instance comic or novel. Typically the Who's in Charge?: Free Will and the Science of the Brain is kind of publication which is giving the reader capricious experience.

**Virgil Santamaria:**

Playing with family in a very park, coming to see the coastal world or hanging out with buddies is thing that usually you might have done when you have spare time, and then why you don't try matter that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Who's in Charge?: Free Will and the Science of the Brain, you are able to enjoy both. It is fine combination right, you still need to miss it? What kind of hang type is it? Oh can occur its mind hangout folks. What? Still don't have it, oh come on its referred to as reading friends.
