Design for Manufacturing: A Structured Approach By Corrado Poli BS MS Ph.D Ohio State

Design for Manufacturing assists anyone not familiar with various manufacturing processes in better visualizing and understanding the relationship between part design and the ease or difficulty of producing the part.

Decisions made during the early conceptual stages of design have a great effect on subsequent stages. In fact, quite often more than 70% of the manufacturing cost of a product is determined at this conceptual stage, yet manufacturing is not involved. Through this book, designers will gain insight that will allow them to assess the impact of their proposed design on manufacturing difficulty.

The vast majority of components found in commercial batch-manufactured products, such as appliances, computers and office automation equipment are either injection molded, stamped, die cast, or (occasionally) forged. This book emphasizes these particular, most commonly implemented processes.

In addition to chapters on these processes, the book touches upon material process selection, general guidelines for determining whether several components should be combined into a single component or not, communications, the physical and mechanical properties of materials, tolerances, and inspection and quality control.

In developing the DFM methods presented in this book, he has worked with over 30 firms specializing in injection molding, die-casting, forging and stamping.

- Implements a philosophy which allows for easier and more economic production of designs
- Educates designers about manufacturing
- Emphasizes the four major manufacturing processes

Editorial Review

Users Review

From reader reviews:

Carl Strum:

As people who live in typically the modest era should be upgrade about what going on or information even knowledge to make these people keep up with the era which can be always change and advance. Some of you maybe can update themselves by studying books. It is a good choice for you but the problems coming to an individual is you don't know which you should start with. This Design for Manufacturing: A Structured Approach is our recommendation so you keep up with the world. Why, as this book serves what you want and wish in this era.

Jonathan McLean:

Do you among people who can't read satisfying if the sentence chained inside the straightway, hold on guys this kind of aren't like that. This Design for Manufacturing: A Structured Approach book is readable by you who hate the straight word style. You will find the information here are arrange for enjoyable studying experience without leaving perhaps decrease the knowledge that want to provide to you. The writer connected with Design for Manufacturing: A Structured Approach content conveys objective easily to understand by lots of people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you continue to thinking Design for Manufacturing: A Structured Approach is not loveable to be your top record reading book?

William Pare:

The particular book Design for Manufacturing: A Structured Approach will bring someone to the new experience of reading a new book. The author style to elucidate the idea is very unique. If you try to find new book to see, this book very suited to you. The book Design for Manufacturing: A Structured Approach is much recommended to you to study. You can also get the e-book from your official web site, so you can more readily to read the book.

Jon Watson:

Spent a free time and energy to be fun activity to do! A lot of people spent their free time with their family, or all their friends. Usually they carrying out activity like watching television, about to beach, or picnic in the park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Might be reading a book might be option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to

consider look for book, may be the publication untitled Design for Manufacturing: A Structured Approach can be fine book to read. May be it is usually best activity to you.
