Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW) By Mark Clark, Cynthia Anfinson

INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS shows students how to apply traditional mathematical skills in real-world contexts. The emphasis on skill building and applications engages students as they master concepts, problem solving, and communication skills. It modifies the rule of four, integrating algebraic techniques, graphing, the use of data in tables, and writing sentences to communicate solutions to application problems. The authors have developed several key ideas to make concepts real and vivid for students. First, the authors integrate applications, drawing on real-world data to show students why they need to know and how to apply math. The applications help students develop the skills needed to explain the meaning of answers in the context of the application. Second, they emphasize strong algebra skills. These skills support the applications and enhance student comprehension. Third, the authors use an eyeball best-fit approach to modeling. Doing models by hand helps students focus on the characteristics of each function type. Fourth, the text underscores the importance of graphs and graphing. Students learn graphing by hand, while the graphing calculator is used to display real-life data problems. In short, INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS takes an application-driven approach to algebra, using appropriate calculator technology as students master algebraic concepts and skills.

Editorial Review

Review

"The quality of the worked examples is first rate. I was pleased to see how that the writers show what a graph done by hand should look like.... Above all, many of the applications were used as motivating factors to develop the math, such as the slope." Robert Diaz, Instructor, Fullerton College

"The main strength of the book is the great balance of concepts, skills, and applications" Lenora G. Sheppard, Instructor, Atlantic Cape Community College

"The main strengths of this textbook lie with the authors' concept for a strong integration of applied math into the core of the material presentation in each section of the book. The margin notes are highly applicable and well placed, and the story problems and Concept Investigations encourage students to go beyond the operations to really understanding the functions and applications of those functions." Katherine Adams, Instructor, Eastern Michigan University

"The Concept Investigations should captivate the students' attention. Most students at this level often ask, 'When will I ever use this?' The Concept Investigations would be effective in addressing this." Mary Legner, Instructor, Riverside City College

About the Author

Mark Clark graduated from California State University, Long Beach, with a Bachelor's and Master's in Mathematics. He is a full-time Associate Professor at Palomar College and has taught there for the past 13 years. He is committed to teaching his students through applications and using technology to help them both understand the mathematics in context and communicate their results clearly. Intermediate algebra is one of his favorite courses to teach, and he continues to teach several sections of this course each year. He has collaborated with his colleague Cynthia Anfinson to write a new intermediate and beginning algebra text published by Cengage Learning--Brooks/Cole. It is an applications-first approach to algebra; applications and concepts drive the material, supported by traditional skills and techniques.

Cynthia (Cindy) Anfinson graduated from UCSD's Revelle College in 1985, summa cum laude, with a Bachelor of Arts Degree in Mathematics and is a member of Phi Beta Kappa. She went to graduate school at Cornell University under the Army Science and Technology Graduate Fellowship. She graduated from Cornell in 1989 with a Master of Science Degree in Applied Mathematics. She is currently an Associate Professor of Mathematics at Palomar College and has been teaching there since 1995. Cindy Anfinson was a finalist in Palomar College's 2002 Distinguished Faculty Award.

Users Review

From reader reviews:

Jennifer Carter:

This Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW) book is not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is information inside this e-book incredible fresh, you will get details which is getting deeper you

read a lot of information you will get. This specific Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW) without we realize teach the one who reading through it become critical in pondering and analyzing. Don't end up being worry Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW) can bring once you are and not make your tote space or bookshelves' come to be full because you can have it in your lovely laptop even cell phone. This Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW) having very good arrangement in word and also layout, so you will not feel uninterested in reading.

Paul Mackey:

Nowadays reading books become more and more than want or need but also get a life style. This reading practice give you lot of advantages. Associate programs you got of course the knowledge even the information inside the book that will improve your knowledge and information. The details you get based on what kind of book you read, if you want send more knowledge just go with training books but if you want sense happy read one using theme for entertaining for instance comic or novel. The particular Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW) is kind of guide which is giving the reader unforeseen experience.

Eric Baur:

Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW) can be one of your nice books that are good idea. All of us recommend that straight away because this reserve has good vocabulary that could increase your knowledge in vocab, easy to understand, bit entertaining but delivering the information. The article author giving his/her effort to get every word into delight arrangement in writing Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW) although doesn't forget the main place, giving the reader the hottest as well as based confirm resource facts that maybe you can be among it. This great information may drawn you into fresh stage of crucial pondering.

Louis Cline:

Guide is one of source of expertise. We can add our knowledge from it. Not only for students but additionally native or citizen need book to know the change information of year in order to year. As we know those ebooks have many advantages. Beside most of us add our knowledge, may also bring us to around the world. Through the book Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW) we can have more advantage. Don't that you be creative people? Being creative person must prefer to read a book. Just simply choose the best book that suitable with your aim. Don't end up being doubt to change your life at this book Intermediate Algebra: Connecting Concepts through Applications (Available Titles CengageNOW). You can more pleasing than now.
