Methods for the Economic Evaluation of Health Care Programs (Oxford Medical Publications) By Michael F. Drummond, Bernard J. O'Brien, Greg L. Stoddart, George W. Torrance

Since its publication in 1987, *Methods for the economic evaluation of health care programmes* has become the standard textbook in this field world-wide. Over the past ten years, the field of economic evaluation in health care has expanded considerably, with a rapid rise in the number of published studies, and wider recognition of their use in health care decision-making. Developments in economic evaluation have also led to the publication of several guidelines for study methodology, most recently those proposed by the United States Public Health Services Panel. The new edition of *Methods for the economic evaluation of health care programmes* follows the same basic structure as the first edition. The key methodological principles are outlined using a critical appraisal checklist that can be applied to any published study. The methodological features of the basic forms of analysis (cost analysis, cost-effectiveness analysis, cost-utility analysis, and cost-benefit analysis) are then explained in more detail. The book has been greatly revised and enlarged, especially with respect to cost-utility and cost-benefit analysis, where major methodological developments have taken place. New to this edition are chapters on collecting and analysing data, and presenting and using economic evaluation results. The new edition will be required reading for anyone commissioning, undertaking, or using economic evaluations in health care, and will be popular with health service professionals, health economists, and health-care decision makers. Reviews of the first edition: 'An important contribution to studies on the economic evaluation of medical care...' (British Medical Journal) 'This is essential reading. Only if all managers are aware of the powers of economic techniques will they be used sensibly' (The Health Service Journal (UK)) 'The methodological chapters on cost analysis and cost utility analysis are gems... should become the standard text on the subject at the intermediate level at which it is aimed.' (Medical Decision Making) 'It leaves nothing important in economic evaluation analysis untouched.' (Health Policy and Planning)

Users Review

From reader reviews:

Leslie Hackett:

Do you have favorite book? In case you have, what is your favorite's book? Guide is very important thing for us to learn everything in the world. Each book has different aim or even goal; it means that publication has different type. Some people sense enjoy to spend their time for you to read a book. They are reading whatever they take because their hobby will be reading a book. Why not the person who don't like looking at a book? Sometime, man or woman feel need book after they found difficult problem or perhaps exercise. Well, probably you will require this *Methods for the Economic Evaluation of Health Care Programs* (Oxford Medical Publications).

Tammy Campbell:

Methods for the Economic Evaluation of Health Care Programs (Oxford Medical Publications) can be one of your nice books that are good idea. All of us recommend that straight away because this e-book has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining but

nonetheless delivering the information. The copy writer giving his/her effort to get every word into joy arrangement in writing *Methods for the Economic Evaluation of Health Care Programs* (Oxford Medical Publications) but doesn't forget the main point, giving the reader the hottest and based confirm resource info that maybe you can be one of it. This great information can certainly drawn you into brand new stage of crucial thinking.

Walter Rojas:

Many people spending their time by playing outside with friends, fun activity using family or just watching TV the whole day. You can have new activity to pay your whole day by reading through a book. Ugh, think reading a book can definitely hard because you have to use the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Touch screen phone. Like *Methods for the Economic Evaluation of Health Care Programs* (Oxford Medical Publications) which is finding the e-book version. So , try out this book? Let's find.

Antoinette Lefebvre:

As a university student exactly feel bored to reading. If their teacher expected them to go to the library as well as to make summary for some e-book, they are complained. Just tiny students that has reading's spirit or real their hobby. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading really. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So , this *Methods for the Economic Evaluation of Health Care Programs* (Oxford Medical Publications) can make you experience more interested to read.
