## **Editorial Review**

### **Amazon.com Review**

Andrew Grove has earned fame and fortune as chairman and cofounder of Intel. But, we learn from this remarkable memoir, he began life under very different circumstances, narrowly escaping the Holocaust and the closing of the Iron Curtain.

Born in Budapest, Hungary, in 1936, Grove--then called Andras Grof--grew up in a modestly prosperous, secular Jewish family. Through foresight and sheer good fortune, they avoided the fate of many of their fellow Jews, fleeing the Nazis into the countryside and living in a dark cellar in which "the sound of artillery was a continuous backdrop." Under the Communist regime that followed, Grove distinguished himself as a student of chemistry and was seemingly destined for a comfortable position in academia or industry--until revolution broke out in 1956 and he found himself in that cellar once again.

How Grove emerged, "swam across" to America, and made a new life under a new name makes a satisfying conclusion to this humane memoir, which gives readers valuable insight into the business guru and technologist. --*Gregory McNamee*

### **From Publishers Weekly**

"Jesus Christ was killed by the Jews, and because of that, all of the Jews will be thrown into the Danube," says a playmate to four-year-old Andris Grof Grove's original name. Born to a middle-class Jewish family in 1936, Grove, chairman of Intel, grew up in Budapest during his country's most tempestuous era. Despite avoiding deportation and death, Grove's family lived in fear during Nazi occupation and lost some rights and property. Afterwards, they lived under Soviet control. Curiously, Grove's memoir charts the routinized mundanities of his teen years seeing his teacher at the opera, being afraid to meet young women at the local public pool, the success of a short story he wrote more than life in war-torn Europe. But his discussion of contemporary politics is astute and personal "I had mixed feelings about the Communists... they had saved my mother's life and my own.... On the other hand... they increasingly interfered with our daily life." Never didactic, he remains focused on his own intellectual growth. Grove continued his education in New York after the 1956 revolution failed. The intelligence, dedication and ingenuity that earned him fame and fortune (he was Time's Man of the Year in 1997) are evident early on. He deftly balances humor e.g., subversive anti-Communist jokes from Hungary with insight into overcoming endless obstacles (from hostile foreign invasions to New York's City University system). Though lacking in drama, Grove's story stands smartly amid inspirational literature by self-made Americans. B&w photos. (Nov. 12)Forecast: Warner's fanfare pre-pub bookseller luncheons, Jewish Book Fair appearances, publication events in New York and San Francisco and concerted media campaigns will bring this book to readers' attention despite it not being the sort of business-oriented book most would expect from Grove. Its unexpected subject matter will mean that, despite the Grove name, it won't come near to matching Welch-size sales, but still, it should thrive.

### **From Library Journal**

Andris Grof was born in 1936 in Hungary; years later, he changed his name to Andrew Grove and went on to help found the Intel Corporation, eventually becoming its CEO and chairman. Grove's memoir recounts his early life in Budapest from his perspective as a Jewish boy trying to make sense of a world torn apart by World War II, the Nazi persecution of the Jews, and the repression of communism. He describes his escape

to New York City after the failed 1956 Hungarian Revolution and how he began to assimilate into American culture. His simple, evenhanded, almost unemotional writing style stands in stark contrast to the events around him, making them seem all the more horrific. While this memoir presents no broad political or historical insights, it is a poignant reminder of the great suffering that took place during the middle part of the last century. This excellent book is recommended for all public libraries and for academic libraries where there is interest in the effects of World War II or the American immigration experience.
