## A Mathematician Reads the Newspaper By John Allen Paulos

With the same user-friendly, quirky, and perceptive approach that made *Innumeracy* a bestseller, John Allen Paulos travels through the pages of the daily newspaper showing how math and numbers are a key element in many of the articles we read every day. From the Senate, SATs, and sex, to crime, celebrities, and cults, he takes stories that may not seem to involve mathematics at all and demonstrates how a lack of mathematical knowledge can hinder our understanding of them.

## **Editorial Review**

From Publishers Weekly

Math professor Paulos's irreverent investigation of the often faulty use of statistics and fact in newspaper articles.

Copyright 1996 Reed Business Information, Inc.

### **Review**

... this book should be mandatory reading for every journalist - as well as the readers, viewers and former tutors they supposedly serve. -- *Robert Matthews, New Scientist, 1995*

A Mathematician Reads the Newspaper is irresistible. -- *Rudy Rucker, Scientific American, 1995*

Although the combination of math and newspapers sounds uniquely unappetizing, John Allen Paulos creates a truly thought-provoking book from that mixture. -- *USA Today, Best Bet, 1995*

But the dirty secret about the media's contribution to American "Innumeracy," first examined in a delightful book by that title by John Allen Paulos, is about to be revealed in his sequel, "A Mathematician Reads the Newspaper." -- *Max Frankel, New York Times, 1995*

Even better, Paulos' wit and humor - admirably displayed in *Innumeracy* - are in top form. His irreverent and pointed comments entertain as well as educate. Though Paulos writes about a bewildering number of topics, he has something fresh and interesting to say about each. -- *Charles Seife, Philadelphia Inquirer, 1995*

In his new book, the mathematician John Allen Paulos continues his witty crusade against mathematical illiteracy ..... Mr. Paulos's little essay explaining the Banzhaf power index and how it relates to Lani Guinier's ideas about empowering minorities is itself worth the price of the book. -- *Richard Bernstein, New York Times, 1995*

It would be great to have John Allen Paulos living next door. Every morning when you read the paper and came across some story that didn't seem quite right - that had the faint odor of illogic hovering about it - you could just lean out the window and shout, "Jack! Get the hell over here!" ..... Paulos, who wrote the bestseller *Innumeracy* (the mathematical equivalent of illiteracy), has now written a fun, spunky, wise little book that would be helpful to both the consumers of the news and its purveyors. -- *Joel Achenbach, Washington Post, 1995*

Paulos uses his considerable talents and a breezy style to discuss many ways to apply simple, or at least simply explained, mathematics and logic to analyze the contents of the newspaper. ... the book is a compendium of unusually sound advice, which, if widely read and understood, could improve a lot more for us than the way we read the newspaper. -- *Journal of the American Medical Association, 1995*

This is press criticism, but not of the usual kind .... This is press criticism of the sort that George Orwell had in mind when he observed that what's important isn't news, and what's news isn't important. .... This is a subversive book. Paulos argues that the world is so complex that it cannot be accurately described, much less manipulated. .... a wise and thoughtful book, which skewers much of what everyone knows to be true. -- *Lee Dembart, Los Angeles Times, 1995*

From the Publisher

"After reading *A Mathematician Reads the Newspaper*, it will be impossible to look at the newspaper in the same way."--*Philadelphia Inquirer*

"It would be great to have John Allen Paulos living next door. Every morning when you read the paper and come across some story that didn't seem quite right--that had the faint odor of illogic hovering about it-- you could just lean out the window and shout, 'John! Get the hell over here!'. A fun, spunky, wise little book that would be helpful to both the consumers of the news and its purveyors." --*Washington Post Book World*

## **Users Review**

**From reader reviews:**

**Mark Hofmeister:**

Book is definitely written, printed, or outlined for everything. You can know everything you want by a guide. Book has a different type. We all know that that book is important factor to bring us around the world. Next to that you can your reading skill was fluently. A guide *A Mathematician Reads the Newspaper* will make you to be smarter. You can feel more confidence if you can know about anything. But some of you think that open or reading the book make you bored. It is far from make you fun. Why they could be thought like that? Have you trying to find best book or suited book with you?

**Marlene Turner:**

Nowadays reading books become more than want or need but also be a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The data you get based on what kind of e-book you read, if you want attract knowledge just go with education books but if you want really feel happy read one with theme for entertaining such as comic or novel. The particular *A Mathematician Reads the Newspaper* is kind of book which is giving the reader unstable experience.

**Troy Riley:**

Spent a free the perfect time to be fun activity to complete! A lot of people spent their down time with their family, or their very own friends. Usually they carrying out activity like watching television, going to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could possibly be reading a book might be option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to test look for book, may be the e-book untitled *A Mathematician Reads the Newspaper* can be great book to read. May be it could be best activity to you.

**Barbara Shephard:**

Many people spending their time by playing outside along with friends, fun activity along with family or just watching TV the entire day. You can have new activity to invest your whole day by looking at a book. Ugh,

you think reading a book will surely hard because you have to accept the book everywhere? It alright you can have the e-book, getting everywhere you want in your Mobile phone. Like A Mathematician Reads the Newspaper which is keeping the e-book version. So , why not try out this book? Let's view.
